Agreed. If they come into compliance with the updated permit it is no longer an issue. If they can't come into compliance, we will need to pursue. Let's visit this again on Friday.

Robert,

I spoke with Asa late afternoon yesterday regarding this as well as Robert in Code Enforcement. Robert was asking for direction on the next step with this as it will not be till July for it to go to a hearing. I assume we will wait a day or two to hear back from Asa but if we still do not have a permit we will need to discuss further with you.

Robert

We are awaiting a response from Compliance at the District. I wanted to have their comments on board before responding to y'all. I should hear from them tomorrow. Thanks.

Tricia,

We reviewed the plans that were sent to us. Below are the items that are still needed as well as comments.

- Provide SJRWMD Environmental Resource Permit and DEP permitting for borrow pit.
- Provide SJRWMD dewatering permit.
- Provide Geotech report showing HGWL at 55' as documentation of the soil bore is required.
- The 1:4 side slope must be maintained until at least two feet below present water level, or a fence must be installed around the pit. Please update detail for Section A-A.
- Provide haul route for loaded trucks. Haul route must be approved by Engineering Services and a bond in place for possible damage to roadway edge.

Please let me know if you have any questions.
