Get vaccinated

Use a mask.

Maintain a distance of 6 feet.

Wash your hands frequently.

Sick? Stay home.

Get a COVID-19 test.

# COVID-19 Vaccine

It is **SAFE**.

Covid 19 vaccines are authorized by the FDA. The testing of these vaccines included the same steps that are taken in full-term clinical trials and were tested on thousands of human participants.

It is **FREE**

Covid 19 vaccines are being given for free to all individuals. There is no out of pocket expense to get the covid 19 vaccine.

It does **NOT** give you Covid

Covid 19 vaccines do **not** contain the SARS-CoV-2 virus that causes Covid 19 and cannot make you sick. The vaccines help the body create a protein that triggers an immune response. Covid vaccines do **not** alter your DNA.

Side effects are typically mild

Most people have no significant side effects. Allergic reactions are rare and each vaccine site is equipped to handle allergic reactions. Prior to taking a vaccine, consult with your health care provider.
