RE: **Minor Traffic Review - REVISED**
Discount Tire
464069 SR 200
Yulee, FL

Introduction

A Discount Tire store is proposed to be developed in Yulee, Florida. The site is located on the north side of SR 200 west of Blackrock Road. The 11.74-acre parcel houses a church campus and the development proposes rezoning, land use amendment, and a lot split 1.7 acres for the tire store. The parcel has access through an existing right-in/right-out driveway to SR 200 and a connection to Cessna Drive. The development proposes to construct a 7,020 SF tire store. Figure 1 shows the most recent site plan. Figure 2 shows the vicinity map.

This REVISED Traffic Study incorporates comments received from Nassau County during review.

Trip Generation

This Traffic Impact Statement uses the *ITE Trip Generation Manual 10th Edition* to estimate the projected trips by this development. Table 1 contains the summary of the trip generation estimate.

Average Weekday Driveway Volumes				AM Peak Hour		PM Peak Hour	
Land Use	ITE Code	Size	Daily Trips	Enter	Exit	Enter	Exit
Tire Store	848	7.02 Th.Sq.Ft. GLA	200	12	7	12	16

The development is estimated to generate 200 daily trips.

Trip Distribution

Trips from the proposed development were assigned to the surrounding roadways based on existing traffic volumes and engineering judgment. This includes 40% to/from the east on SR 200; 40% to/from the west on SR 200; 5% to/from the north on Chester Rd; 5% to/from Blackrock Road; 5% to/from the south on Arrigo Road; and 5% to/from the south on Amelia Concourse.

Roadway Segment Analysis

The revised analysis Table 2 shows existing peak hour volumes, estimated new project trips, and Full Build volumes.

Table 2 - Roadway Segment Concurrency - Peak Hour

Roadway	From	To	Lanes	Cap	2021 Existing Pk Hr Vol	Develop Pk Hr Volumes	2022 Full Build Pk Hr Vol	Avail Cap	LOS
SR 200	Chester Rd	O'Neill Scott Rd	6	4590	3689	11	3700	890	C
Arrigo Blvd	SR 200	Nassau Lakes	2	1015	704	2	706	309	C
Cessna Rd	SR 200	Access	2	1015	8	15	23	992	C
Blackrock Rd	Heron Isle	SR 200	2	1152	512	2	514	638	C

Analysis shows that the roadway segments in the study area projected to continue to operate acceptably.

Intersection Capacity Analysis

Nassau County requested peak hour intersection capacity analysis as part of this study.

Traffic data for the study was collected on September 29 and October 5, 2021. Existing traffic volumes are shown in Figure 2. Full Build 2022 volumes are shown in Figure 3.

It should be noted that SR 200 is under construction and will be a six-lane divided roadway with lane geometry improvements to intersections. This improvement is included in the analysis.

SR 200 & Chester Road/Amelia Concourse

		TH	A	7.3	36'	A	8.3	40'
		RT	A	7.3	36'	A	8.3	40'
OVERALL			C (22.2)			C (20.8)		

Analysis shows that the intersection is projected to continue to operate at LOS C overall in the Full Build scenario. The development has a negligible impact to the intersection.

Turn Lane Analysis

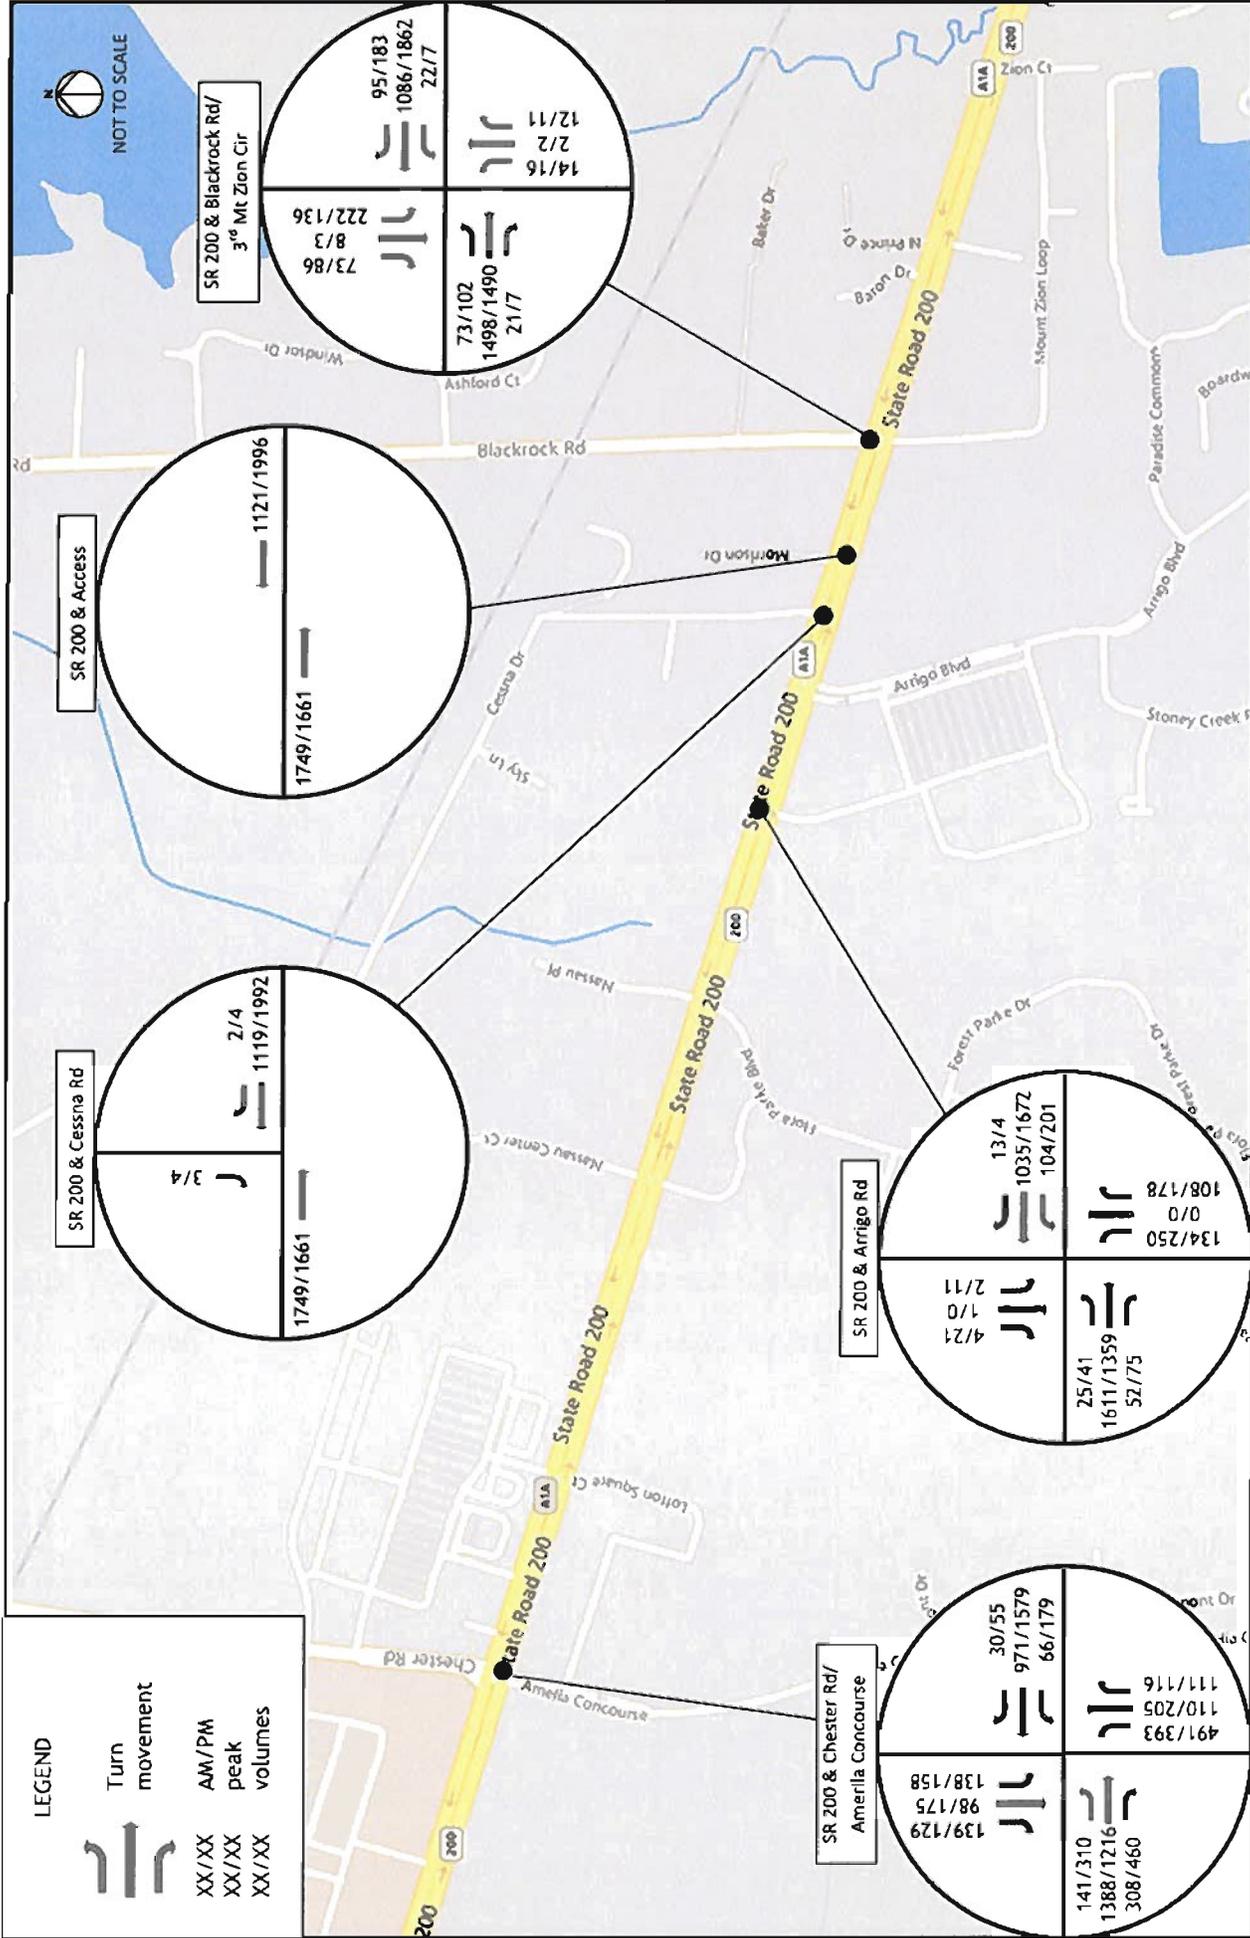

The FDOT Driveway Handbook states that a right-turn lane is recommended for driveways that see 35 to 55 turns per hour on roadways with a posted speed limit greater than 45 mph.

Analysis shows that both accesses are expected to see fewer than 35 right-turning vehicles per hour. This is below FDOT thresholds for right-turn lanes.

Nassau County guidelines for turn lanes on major or minor collectors are based on the posted speed limit. For collector roads with posted speed limits of 35 mph or greater, a right-turn lane is needed for a development that will generate 250 vehicles per day. Since the site has two access connections, both driveways are projected to see 125 vehicles per day each, which is below County thresholds for a turn lane.

No improvements are recommended.

Please contact me at scott@traffic-impact.com or by phone at 407.607.6985 with any questions.
