PLANT SCHEDULE SHEET L1.07

TREES	BOTANICAL / COMMON NAME	CONT	CAL	SIZE
LA*	Liquidambar styraciflua / Sweet Gum	3" cal		
LSA*	Liquidambar styraciflua / Sweet Gum	3" cal		
TD*	Taxodium distichum / Bald Cypress	16" cal		

SHRUBS	BOTANICAL / COMMON NAME	CONTAINER	MIN. SIZE	SPACING
AF2	Azalea indica Formosa / Formosa Indica Azalea	5 gal		
HQ	Hydrangea quercifolia / Oakleaf Hydrangea	5 gal		
IN	Ilex cornuta Needpoint / Needpoint Chinese Holly	3 gal		
MC	Muhlenbergia capillaris / Pink Muhly Grass	1 gal		
NC	Nerium oleander 'Calypso' / Calypso Oleander	5 gal		
NS	Nerium oleander 'Petite Salmon' / Petite Salmon Oleander	3 gal		
PV	Pittosporum tobira 'Variegata' / Variegated Japanese Pittosporum	15 gal		

GROUND COVERS	BOTANICAL / COMMON NAME	CONTAINER	MIN. SIZE	SPACING
CT	Cynodon x Tifton 528 / Tifton Bermudagrass	SOD	9" Sod	as shown
TD	Tripsacum dandatum / Florida Gamagrass	Plugs		36" o.c.

Plant material: All installed trees, shrubs and groundcovers shall conform to the standards for Florida Grade #1 or better according to the current edition of "Grades and Standards for Nursery plants" published by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry. Synthetic or artificial trees, shrubs, groundcovers or vines are not acceptable substitutes. In choosing plant materials, consideration should be given to the amount of sun or shade, the wetness or dryness of the soil, the effects of salt spray (where applicable), the amount of irrigation required and the mature size and spatial needs of plants chosen.

- The minimum number of trees required by this section shall be either qualifying existing trees preserved on-site or more than one species listed in Tables 37-1 or 37-2. Trees planted in addition to these minimum requirements of this section may be any species of canopy tree or palm except for the prohibited species listed herein. In order to prevent a monoculture, new landscaping should not include more than fifty (50) percent of any one genus or twenty-five (25) percent of any one species. All trees shall be planted in a minimum dimension of ten (10) feet. This minimum planting area must be free of all pavement and vehicle overhang in order to prevent possible tree damage. All trees shall have a minimum trunk diameter, measured six (6) inches above ground level, in accordance with Table 37-3.
- Shrubs shall have a minimum height of eighteen (18) inches when planted. When planted as a hedge, the maximum spacing is 30 inches on center. All shrubs used for visual screening shall be of a plant species that is capable of reaching a height of four (4) feet within twenty-four (24) months under normal growing conditions. Shrubs used as accent ground cover and vines may vary in size depending on the type of plant material and the desired effect.
- Groundcovers shall be planted in such manner as to present a finished appearance and complete coverage within one (1) year after planting.

"Upland buffers shall be maintained in their natural vegetated condition. Native vegetation removed or destroyed within the upland buffer in violation of Nassau County Comprehensive Plan Policy 1.04A.02 shall be restored. These areas shall be replanted with comparable native vegetative species as were removed or destroyed. Noxious and non-native invasive plant materials can be removed. Dead vegetation can be removed. Limbing can occur within the buffers, provided that the limbs to be removed are less than three (3) inches in diameter."
